Chair called road inspection meeting to order 8am. Chair, Sup 1, Sup 2 and Road Maintenance Jim Brande in attendance.

Chair has driven all but 1 road over the past 3 days and rated roads with a 1-9 scale. After some discussion we put together a plan to list all roads in poor to failing condition, then send out that list to each supervisor to list them by priority for repair/ rebuilding. Discussion on how the roads deteriorated that were in good shape last fall, Chicago Dr just passed where we did cold mix last year to 13th Ln. it is in terrible condition now.

8:30am, We paused road meeting to interview Travis for the part time position, after several questions we thanked him for stopping by and would be in touch.

8:50am resumed our road meeting. Once our road list is put in order, we will list them on a 3 or 5 year plan, the plan can change every year but this will provide a plan on road repairs. If we have more funding, we can add roads as needed to what we are able to repair in any given year. So, Chairman will create a list and send it to all for review, we will discuss list on a later date.

9:08 meeting adjourned.
